

Vision Is Primary

The future belongs to those who believe in the beauty of their dreams. - Eleanor Roosevelt

Vision Is Primary is a software engineering company founded on the understanding that a dream can change world. Our core belief is that every human on earth has special gifts and talent, which when harnessed can make all of our lives better. We believe that each of us need each other because of these peculiar gifts

We believe a vision is a step above a dream, because it moves a dream from an imagination, to a picture with an actionable plan thus Vision Is Primary, meaning moving your imagination to an actionable plan is the first step

Software is now at the core of almost everything we do, and is unparalleled in its ability to increase productivity, this makes software the best tool to help solve many of the world's problems, but for that to happen, enough people have to dare dream

Vision

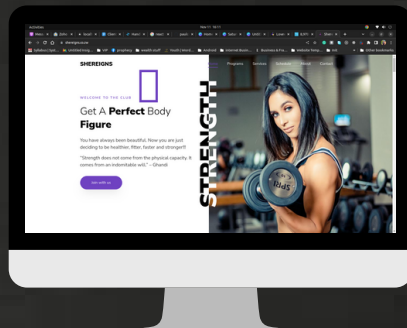

A world in which people can dare dream and bring about solutions to their world independent of their background

Mission

Inspire people to achieve their loftiest dreams and use software to make it simpler to actualize

Values

Courage. Vision. Conviction

Our Founder

Unashe Anele Siwawa has over 5 years of software developing software, releasing software into the market. With 29 repositories published on Github and BirBucket, he has a depth understanding of the inner working of software and most importantly its impact on human society

Unashe Anele Siwawa
